Sketching / Digital Practice

As your studies and practice in landscape architecture involve visual communications, you would be well-served to practice your hand and digital representation skills this spring/summer. Spend some time sketching and diagramming this summer as you enjoy the sunshine, drawing what you find important in the places you visit. Get acquainted, or more facile, with graphic software, such as Google SketchUp and/or Adobe programs. Start a personal digital collection, taking photos of places and features that interest you.
