Sketching Trees

Not only do trees shade and protect us, but they also add beauty, color, texture and so much more. They speak to us about a place and time. They are an essential design tool for every landscape architect, so knowing how to represent them in your projects is important.

This one-day workshop will teach you how to sketch trees in pencil and watercolor—spreading or columnar, deciduous or evergreen, foreground or background.

LECTURE OPEN TO ALL

Gould 322
Friday, May 12
5:00 pm

WORKSHOP BY APPLICATION

L ARCH 498 (1 cr.)
Saturday, May 13
9:00 AM - 4:00 PM

APPLY HERE
by Friday March 10
